

ALUMINIUM TECHNOLOGY

BCT CUSTOMER SERVICE AND CONSULTING SERVICES

BUSS ChemTech AG (BCT) is offering worldwide service activities for all our supplied equipment and production lines for a continued high quality Green Anode Production within the Aluminum Industry. The usage of our original quality spare parts ensures you a smooth and continued production with a peak in performance and durability. We are continuously developing and improving our material in close collaboration with our customers to increase the efficiency of the spare parts for them.

YOUR MAIN ADVANTAGES

- OEM first class anode paste kneader spare parts
- High operating life with associated low maintenance costs

We are committed to ensure you a first class worldwide customer support to fulfill your continuously increasing production demand. We established extensive experience over the last 65 years by concentrating on machine optimization, maintenance services with a worldwide spare and wear part supply. All our OEM spare parts undergo a standardized and strict quality assurance control process to ensure you have a trouble free and prolonged continued operation.

YOU GET

- Original part design
- Continually improved spare parts
- The choice of different types of spare part executions (Standard-, High-, and Ultra High wear protection). This allows a well customized product for your specific requirement.
- On stock delivery of the common spare and wear parts
- Fast field expert hands-on support whenever you need it
- Service and maintenance contracts
- Our highly skilled and experienced engineers and technicians are available to provide you the highest level of support to execute your inspections, process studies, training and all kind of technical support whenever, wherever you need it.

Main wear parts of the BCT Paste Kneader
